Index for Volume 28 (1979)

COMPILED BY TROY L. BEST

α-glycerophosphate dehydrogenase, 164–175
Acanthis
  flammea, 275
  flavirostris, 271, 274, 275, 279
Adapidae, 451–464
Adaptation, 554–578, 600–621
Adaptation and selection, point of view on, Norman Macbeth, 107–108
Adaptive zones, 554–578
Adriatic Sea, 284–298
Agrostis, 82
Albrecht, Gene H., The study of biological versus statistical variation in multivariate morphometrics: The descriptive use of multiple regression analysis, 338–344
Allodape, 3
Allodapinae, 1–21
Allodapula, 3
Allodapulodes, 3
Allopatric speciation, 299–307
Allozyme variation, 63–70
Allozymic distance, 22–39
Alternative methods of phylogenetic inference and their interrelationship, Joseph Felsenstein, 49–62
Ambystoma, 597
  tigrinum, 580
Amia, 323
Amphibia, 579–599, 627–634
Anaethalion vidali, 328
Analysis,
  discriminant function, 176–196
  multiple regression, 338–344
  multivariate, 176–196, 338–344
  principal components, 176–196
Andersen, Nils Møller, Phylogenetic inference as applied to the study of evolutionary diversification of semiaquatic bugs (Hemiptera: Gerromorpha), 554–578
Aneides, 580, 596, 597
Annotated Linnaean hierarchies, 308–337
Anolis
  blanquillonus, 214–216
  bonairensis, 214–216
  griseus, 214–216, 219
  luciae, 214–216
  richardi, 214–216, 219
  trinitatus, 214–216, 219
Anser anser, 140
Apidae, 1–21
Aptenodytes forsteri, 151
Archaeopteryx, 326, 329, 577
Ascaphus truei, 83
Asclepios, 566
Ashlock, Peter D., An evolutionary systematist's view of classification, 441–450
Assumptions,
  multivariate analytic, 176–196
Atalophlebioides aucklandensis, 227
Ateles, 139, 144, 148, 156
  geoffroyi, 140, 145, 154
Atractosteus, 319
Austrosimulium ungulatum, 103
Avus ancestorcus, 330
Awards from the Systematic Biology Program of the National Science Foundation, fiscal years 1973–1977, summary of, Jason A. Lillegraven and Tod F. Stuessy, 123–131

Baiomys, 40–48
  musculus, 45
  taylori, 42–46
Baker, R. J., see Yates, T. L., —

Brevineura, 3
Brooks, Daniel R., Testing the context and extent of host-parasite coevolution, 299–307

Call learning in the Carduelinae: Ethological and systematic considerations, Paul C. Mundinger, 270–283
Callithrix jacchus, 151, 154
Canidae, 455, 456
Canis
familiaris, 140, 145, 151, 376
latrans, 455
lupus, 455
Cantius ralstoni, 461
Carduelinae, 270–283
Carduelis, 270
chloris, 277
lawrencei, 279
pinus, 273, 277, 279
psaltria, 279
spinus, 272, 273, 277, 279
tristis, 271, 273, 279
Carpodacus mexicanus, 271, 275, 279
Casuariidae, 320
Catostomus clarkii, 141
Cautionary remarks on using gene expression events in parsimony procedures, Walter M. Fitch, 375–379
Cebus, 139, 144, 148, 149, 156
apella, 140, 145, 154
Cepea nemoralis, 231
Cercocebus, 260
albigena, 259, 261, 263
atys, 140, 145, 154, 263
galeritus, 259, 261, 263
Cercopithecidae, 259
Cercopithecus, 139, 141, 143, 150, 260, 261
aethiops, 140, 145, 154, 262
Cervus elephas, 151
Chamaesyce origanoides, 251
Chapman, David J., see Ragan, Mark A., and —
Character analysis, 356–365
Character state projections, 356–365
Characters, 537–546
behavioral, 270–283
Chepuvelia, 559
Chesapecten, 235
Cicadidae, 22–39
Cladism, 530–536
Cladism, the limits of, David L. Hull, 416–440
Cladistic analysis and synthesis: Principles and definitions, with a historical note on Adanson's *Familles des Plantes* (1763–1764), Gareth Nelson, 1–21
Cladistics, 22–39, 49–62, 214–219, 259–269, 416–440, 441–450, 451–464, 483–519, 537–546
Cladistics and plant systematics (rev.), 400–411
Cladogram compatibility, 356–365
Cladograms and phylogenetic trees, E. O. Wiley, 88–92
Classification, 1–21, 416–440, 441–450, 451–464, 465–482, 483–519
conventions for, 308–337

Systematic Zoology

Published by

The Society of Systematic Zoology

Contents of Volume 28, 1979, Numbers 1–4

Issued 1979, Lawrence, Kansas U.S.A.

NUMBER 1

Cladistic Analysis and Synthesis: Principles and Definitions, with a Historical Note on Adanson's *Familles des Plantes* (1763–1764) *Gareth Nelson* 1
Evolution of Periodical Cicadas: Phylogenetic Inferences Based on Allozymic Data *Chris M. Simon* 22
Phylogenetic Analysis of Karyological Variation in Three Genera of Peromyscine Rodents *T. L. Yates, R. J. Baker and R. K. Barnett* 40
Alternative Methods of Phylogenetic Inference and Their Interrelationship *Joseph Felsenstein* 49
A Relationship of Genetic Variation Within and Among Populations: An Extension of the Kluge-Kerfoot Phenomenon *Benjamin A. Pierce and Jeffry B. Mitton* 63

Points of View
The Role of Symmetry in Ghiselin's "Radical Solution to the Species Problem" *Edward S. Reed* 71
Comments on Assessing the Dedifferentiating Effect of Gene Flow *James F. Jackson and J. Alan Pounds* 78
Persistence of Ancestral-Sister Species *Michael A. Bell* 85
Cladograms and Phylogenetic Trees *E. O. Wiley* 88
Compatibility Analysis and the Uniquely Derived Character Concept *Walter J. Le Quesne* 92
A Note on the use of INDSCAL for the Comparison of Several Classifications *Glenn W. Milligan* 94
Generalized Tracks and Dispersal in Biogeography: A Response to R. M. McDowall *Robin C. Craw* 99
Point of View on Adaptation and Selection *Norman Macbeth* 107

Reviews
Molecular Anthropology: Genes and Proteins in the Evolutionary Ascent of the Primates • On the Evolution of Myoglobin • Philosophische Probleme der Arttheorie • Arachnology 109
Books Recieved 117
Notices 118

NUMBER 2

Summary of Awards from the Systematic Biology Program of the National Science Foundation, Fiscal Years 1973–1977 *Jason A. Lillegraven and Tod F. Stuessy* 123
Fitting the Gene Lineage into its Species Lineage, a Parsimony Strategy Illustrated by Cladograms Constructed from Globin Sequences *Morris Goodman, John Czelusniak, G. William Moore, A. E. Romero-Herrera, and Genji Matsuda* 132
Electrophoretic Heterogeneity of α-Glycerophosphate Dehydrogenase among many Species of *Drosophila* *Jerry A. Coyne, Walter F. Eanes, John A. M. Ramshaw, and Richard K. Koehn* 164
Multivariate Analysis of Hybrid Fishes *Nancy A. Neff and Gerald R. Smith* 176

Points of View
A Note on Phenetic and Phylogenetic Classifications *M. F. Janowitz* 197
On the Naturalness of Phylogenetic Classification *James S. Farris* 200
Electrophoresis and Cladistics *Peter R. Baverstock, Stephen R. Cole, Barry J. Richardson, and Christopher H. S. Watts* 214
Geographic Populations or Biological Species in Phylogeny Reconstruction? *Kåre Bremer and Hans-Erik Wanntorp* 220
On the Importance of Heterochrony for Evolutionary Biology *Stephen Jay Gould* 224
On the Origin of Flightlessness in Ephemeroptera *Michael D. Hubbard* 227
Testing Statistical Significance of Geographic Variation Patterns *Robert R. Sokal* 227
The 12th Annual Numerical Taxonomy Conference *Norman I. Platnick and L. F. Marcus* 232

Reviews
Biosystematics in Agriculture • Essays in Plant Taxonomy • Arthropod Phylogeny • A Biochemical Phylogeny of the Protists • Biogeographie: Fauna und Flora der Erde und ihre geschichtliche Entwicklung 239
Books Received 252
Notices 253

NUMBER 3

The Phyletic Position of *Theropithecus*: Congruence Among Molecular, Morphological, and Paleontological Evidence *J. E. Cronin and W. E. Meikle* 259
Call Learning in the Carduelinae: Ethological and Systematic Considerations *Paul C. Mundinger* 270
Phenetic Relationships Among Populations of *Podarcis sicula* and *P. melisellensis* (Sauria: Lacertidae) from Islands in the Adriatic Sea *Robert C. Clover* 284
Testing the Context and Extent of Host-Parasite Coevolution *Daniel R. Brooks* 299
An Annotated Linnaean Hierarchy, With Comments on Natural Taxa and Competing Systems *E. O. Wiley* 308
The Study of Biological Versus Statistical Variation in Multivariate Morphometrics: The Descriptive Use of Multiple Regression Analysis *Gene H. Albrecht* 338
An Ultrastructural Approach to Planarian Taxonomy *Vittorio Gremigni* 345
A Technique for Analysis of Historical Biogeography and Other Characters in Comparative Biology *John C. Morse and David F. White, Jr.* 356

Points of View
Phenetic Analysis of a Single Data Set: Phylogenetic Implications *William Presch* 366
Optimal Classifications *William L. Fink* 371
Cautionary Remarks on Using Gene Expression Events in Parsimony Procedures *Walter M. Fitch* 375
Further Remarks on the Parameter of Gene Duplication and Expression Events in Parsimony Reconstructions *Morris Goodman, John Czelusniak and G. William Moore* 379
The Evolutionary Species: Fact or Fiction? *Søren Løvtrup* 386
Fitness, Survival, and Reproduction *Nelson G. Hairston, Jr.* 392
The Verification of Numerically Universal Statements *David B. Kitts* 395
Reviews
Cladistics and Plant Systematics 400
Books Received 412
Notices 413

NUMBER 4

THE WILLI HENNIG MEMORIAL SYMPOSIUM
The Limits of Cladism *David L. Hull* 416
An Evolutionary Systematist's View of Classification *Peter D. Ashlock* 441
Paleontology, Phylogeny, and Classification: An Example from the Mammalian Fossil Record *Phillip D. Gingerich* 451
Purposeful Phenetics *J. McNeill* 465
The Information Content of the Phylogenetic System *James S. Farris* 483

PHILOSOPHICAL ISSUES IN SYSTEMATICS
Popper on "When is a Science not a Science?" *Tom W. Settle* 521
Falsifiability, Consilience, and Systematics *Michael Ruse* 530
Philosophy and the Transformation of Cladistics *Norman I. Platnick* 537
A Bayesian Probability View of Phylogenetic Systematics *Charles W. Harper, Jr.* 547

Phylogenetic Inference as Applied to the Study of Evolutionary Diversification of Semiaquatic Bugs (Hemiptera: Gerromorpha) *Nils Møller Andersen* 554
The Genetic Relationships of the Salamanders of the Genus *Plethodon* *Richard Highton and Allan Larson* 579
Natural Selection and the Criteria by Which a Theory is Judged *Ronald H. Brady* 600

Points of View
The Causes of Evolution: Converging Orthodoxy and Heresy *Cesare Baroni-Urbani* 622
Hierarchy and Reticulation in Systematics *Kåre Bremer and Hans-Erik Wanntorp* 624
Paraphyly of the *Rana boylii* species group
James S. Farris, Arnold G. Kluge, and M. F. Mickevich 627
Reviews
Arthropod Phylogeny with Special Reference to Insects • Simplicity • Evolutionary Biology • Evolutionary Trends in Heteroptera 635
